

EXPERIMENT-2

NAME: Nishanth B

ROLL NO:240701364

Aim:

To create a sample application in Zoho Creator, create a form, report, and dashboard, and explore the Develop, Deploy, and Manage sections of the Zoho Creator platform.

Setting up Zoho Creator:

I. Create the Sample Application

Procedure:

- Logged in to Zoho Creator.
- Clicked Create New Application.
- Selected From Scratch.
- Entered the application name as Sample.
- Clicked Create.

II. Creating Form

Procedure:

- Clicked Create → Form.
- Entered the form name as Employee Details.
- Added the required fields such as Name, Emp_Number, Dept, Email, and Phone.
- Saved the form.

Explanation:

A form is used to collect information from users. It contains various input fields where users can enter data. The submitted data is stored in the application's database.

III. Creating Report

Procedure:

- Clicked Create → Report.
- Selected the Employee Details form.
- Created the report and saved it.

The screenshot shows a web application interface for an "Employee Registration Form". On the left is a dark sidebar with a menu containing "Employee Registrations" and "Employee Registration Form". The main content area contains the form with the following fields: "Name" (split into "First Name" and "Last Name"), "Emp_Number" (with a masked input "#####"), "Dept" (a dropdown menu showing "Select"), "Email", and "Phone" (with a country code dropdown showing "+91" and a masked input "01234 56789"). A blue "Submit" button is at the bottom. The top of the application shows a "Sample" title bar with icons for chat, settings, and help, and a notification "Trial expires in 15 days" with links to "Upgrade", "Edit this application", and "Help". The bottom left of the sidebar shows a user profile for "NISHANTH B.".

Explanation:

A report displays all the records entered through the form. It helps users search, sort, filter, and manage the stored data efficiently.

IV. Creating Dashboard

Procedure:

- Clicked Create → Dashboard.
- Added report/chart components.
- Saved the dashboard.

The screenshot shows a web application interface. On the left is a dark sidebar with a menu containing 'Employee Registrations' and 'All Employee Registrations'. The main area is titled 'All Employee Registrations' and displays a table with the following data:

Name	Emp_Number	Dept	Email	Phone
bbb sss	123	SALES	fff@gmail.com	+919876514321
aaa bbb	122	SALES	xxx@gmail.com	+91876514320

At the bottom of the table, it says 'Showing 2 of 2'. The top right of the interface shows a 'Trial expires in 15 days' message and links for 'Upgrade', 'Edit this application', and 'Help'.

Explanation:

A dashboard provides a graphical overview of application data. It combines reports and charts in a single page, making it easier to analyze information quickly.

Exploring the Platform Architecture and Interface

Develop

- The Develop section is used to build applications.
- It allows users to create forms, reports, pages, and workflows.
- It also supports application customization using Deluge scripting.

Deploy

- The Deploy section is used to publish applications.
- It allows sharing applications with users securely.

- User roles and permissions can also be configured here.

Manage

- The Manage section is used to administer the application.
- It helps manage users, backups, and integrations.
- It also monitors application performance and security.

4. Result

Thus, a Zoho Creator account was created successfully. A sample application with a form, report, and dashboard was developed, and the Develop, Deploy, and Manage sections of the Zoho Creator platform were explored successfully.
